

CIC nanoGUNE Consolider: the big challenge of the small

J. M. Pitarke

CIC nanoGUNE, Tolosa Hiribidea 76, E-20018 Donostia

In the framework of the so-called nanoBasque initiative of the Department of Industry, Trade, and Tourism of the Basque Government and the Spanish Consolider-Ingenio program, the Nanoscience Cooperative Research Center (CIC) nanoGUNE Consolider has been opened recently with the mission of addressing both basic and applied nanoscience world-class research for the competitive growth of the Basque Country. In this talk, I intend to give an overview of the current status of this challenging project, which we call 'the big challenge of the small' not only because it refers to the science of the small but also because it represents a big challenge for a small but successful region that is currently aiming at becoming an innovation reference in Europe.
